These valuation studies are listed in the same manner as presented by the ICC to the public through the Valuation Dockets.

Many of the large active railroads of the time were subsidiaries of larger companies.

Here, I’ll try to give you a rundown of where you can find Railroads, active in 1918, that were listed as part of the Valuation Docket of the parent or controlling companies. Where just one company is listed, it is a stand-alone Valuation for that company so look for that company’s name under the proper file. Where other companies are listed indented below the main company, the main company is where you’ll find their valuations. No predecessor companies to the companies evaluated are listed. Several of the indented companies, appearing on a larger company’s valuation were not necessarily owned or controlled by that larger company. I was once told that these smaller, non-related companies were included because of similarities to the larger company listed.
